

TRAFFIC CONTROL MATERIAL FIELD SECTION 1063

1063.1 SCOPE. To establish procedures for inspection and acceptance of traffic control materials.

1063.2 PROCEDURE

1063.2.1 Flexible Non-Metallic Drum-Like Channelizers.

1063.2.1.1 Qualified List. A list of qualified brand names or model numbers of flexible non-metallic drum-like channelizers is maintained by the Project Operations-Materials. This list is shown in [FS-1063 Table 1](#) of this Manual. A list of qualified reflectorized striping tapes for use on the qualified flexible non-metallic drum-like channelizers is shown in [FS-1063 Table 2](#) of this Manual.

1063.2.1.2 Brand Name or Model Qualification of Channelizers. If a manufacturer desires to have an item added to the list of qualified flexible non-metallic drum-like channelizers, a certification shall be furnished to the State Project Operations Engineer-Materials, in accordance with the specifications for Flexible Non-Metallic Drum-Like Channelizers. The certification shall include the brand name or model number, channelizer dimensions, and the type, grade, manufacturer, and the number and width of stripes for each color of reflective sheeting. The certification shall also include certified test results of impact tests performed as required by the specifications. Following a review of the required documents, satisfactory channelizers will be placed on the list of qualified channelizers.

1063.2.1.3 Brand Name Qualification of Reflectorized Striping Tape. If a manufacturer desires to have an item added to the list of qualified reflectorized striping tapes, a certification shall be furnished to the State Project Operations Engineer-Materials, in accordance with the specifications for Flexible Non-Metallic Drum-Like Channelizers. The certification shall state that the reflectorized striping tape conforms to all requirements of the specifications including a statement that it is intended for use on flexible channelizers. The manufacturer shall also submit samples of the reflectorized striping tape along with typical tests results indicating the material meets the requirements for Type 2 reflective sheeting. Following a review of the required documents and upon completion of any tests required, the sheeting will be placed on the list of qualified reflectorized striping tapes.

1063.3 ACCEPTANCE.

1063.3.1 Flexible Non-Metallic Drum-Like Channelizers. Flexible non-metallic drum-like channelizers appearing on the list of qualified channelizers may be accepted on the basis of brand name or model number provided they have the proper reflective marking tape, visual inspection, and field performance. Inspection may be performed by Materials or Construction. A SiteManager record shall be created documenting the brand name and model number, with comments on the reflective tape and general condition of the channelizers.
